^a The margin of error surrounding the reported mean forms a 95% confidence interval - a range of values with a 95% likelihood to contain the true population mean.

^b Standard deviation is a measure of the average amount the individual scores deviate from the mean of all the scores in the distribution.

^c This statistic represents the probability that the difference between the mean of your institution and that of the comparison group occurred by chance.

^d Effect size is calculated by subtracting the comparison group mean from the school mean, and dividing the result by the standard deviation of the comparison group.

^a The margin of error surrounding the reported mean forms a 95% confidence interval - a range of values with a 95% likelihood to contain the true population mean.

^b Standard deviation is a measure of the average amount the individual scores deviate from the mean of all the scores in the distribution.

^c This statistic represents the probability that the difference between the mean of your institution and that of the comparison group occurred by chance.

National Survey of Student Engagement
The College Student Report

NSSE 2002 Detailed Statistics
San Jose State U First-Year Students

Mean				Margin of error (95% level) ^a				Standard deviation ^b				Number of respondents				Significance ^c			Effect size ^d					
San Jose State U	Cal State System	Master's	NSSE 2002	San Jose State U	Cal State System	Master's	NSSE 2002	San Jose State U	Cal State System	Master's	NSSE 2002	San Jose State U	Cal State System	Master's	NSSE 2002	<i>San Jose State U compared with</i>			Cal State System	Master's	NSSE 2002	Cal State System	Master's	NSSE 2002

^d Effect size is calculated by subtracting the comparison group mean from the school mean, and dividing the result by the standard deviation of the comparison group.

^e Response set is categorical; means and mean comparisons do not apply.

^a The margin of error surrounding the reported mean forms a 95% confidence interval - a range of values with a 95% likelihood to contain the true population mean.

^b Standard deviation is a measure of the average amount the individual scores deviate from the mean of all the scores in the distribution

^c This statistic represents the probability that the difference between the mean of your institution and that of the comparison group occurred by chance

^d Effect size is calculated by subtracting the comparison group mean from the school mean, and dividing the result by the standard deviation of the comparison group

	Mean				Margin of error (95% level) ^a				Standard deviation ^b				Number of respondents				Significance ^c			Effect size ^d
